

METHOD, SYSTEM, AND PRODUCT  
FOR FACILITATING INTERNATIONAL TRAVEL  
WITH RESPECT TO IMMIGRATION

5

ABSTRACT

- 10 Method, system, and product for facilitating international travel, including creating, in  
response to a signal from an internet-enabled device coupled for data communications  
through an internet to an international travel server, a travel record to be stored within  
the international travel server; creating in dependence upon the travel record, an  
immigration admissions form for the destination country; and submitting the  
15 immigration admissions form to an immigration admission forms database for the  
destination country.
